Let's Find Out[®]

My Weekly Reader[®]

Busy, Buzzy Bees

What keeps bees so busy?

Bees Are Busy!

Bees eat pollen and nectar.

Bees are busy eating!

They get food from flowers.

Bees are busy flying!

They fly home to their hive.

Bees are busy working!

They make honey together.

Bees are busy buzzing!

The sound is their wings moving fast.

Don't bug the busy bees, bear!

Move and Learn

Let's buzz like busy little bees
Buzzing all around.
Buzz high! Buzz low!
Buzz fast! Buzz slow!
And now let's sit back down.

BIG WORD insect

APPLYING KNOWLEDGE

An **insect** is an animal with 3 body parts and 6 legs. Some **insects** have wings. A bee is an **insect**.

Count the legs on each critter below. Click to circle the insects.

BONUS: What insect is this? Label it!
